

CYBER GRIFFIN

(CASE STUDY)

Our NCSC assured case studies are designed to offer an engaging alternative to conventional training, providing a behind-the-scenes look into an offender's criminal activity and the subsequent Police investigation. Whether you have previously undergone cyber security awareness training or are in the search of a fresh perspective, these sessions offer a unique insight into cyber crime and the investigation techniques that are in use today.

KEY BENEFITS:

- Based on recent cases investigated by UK Policing and its global law enforcement partners.
- Witness firsthand the stages of a Police investigation and the challenges faced.
- Gain insight into the significance of sound cyber practices and learn how to protect yourself.
- Delegates will leave with a renewed sense of the importance of good cyber hygiene as well as an understanding of the positive impact Policing can have.
- Send your employees as part of their induction training or yearly CPD®

Join our interactive sessions which take you through the full stories behind cyber crime investigations and improve your understanding of cyber security by learning about adversaries and the tactics they employ. The first in this series documents a spear phishing attack, the methods the criminals used to target victims, and the actions taken by the Police investigation team to identify and arrest those involved. All our case studies are taken from real Police investigations.

Evidence shows that effective security requires we understand how to defend ourselves and, as importantly, that we believe in the benefits of applying security in our everyday lives. Build your knowledge of cyber security through these case studies which help to connect the defences we use, to the methods cyber criminals employ. Discuss how each defence reduces the risk of intrusion and explore practical examples which demonstrate how powerful effective security can be.

Engage with Police investigations and discover how you can contribute to keeping your community safe. Take this opportunity to speak with Police officers and see how your information drives Policing's ability to protect businesses and individuals from cyber criminality.

TAILORED TO ASSIST YOU

We are an independent, vendor agnostic service, with direct access to Police and Action Fraud databases. Our intelligence led services are continually updated to reflect the most relevant and prevalent threats to your business.

Whether you are a small medium enterprise, or a large corporation, we have a range of services tailored to assist you.

FREE OF CHARGE

All of our services are provided free of charge and designed to be accessible to everyone, whether they have very little knowledge of cyber crime, or are individuals who hold IT security and risk management roles.
